## **TOWN WARRANT.**

---

### **STATE OF NEW HAMPSHIRE.**

*To the inhabitants of the Town of Wilton, in the County of Hillsborough, in said State, qualified to vote in Town Affairs.*

You are hereby notified to meet at the Town Hall in said Wilton on Tuesday, the 13th day of March next, at nine of the clock in the forenoon, to act upon the following subjects :

1 To choose all necessary Town Officers for the year ensuing.

2 To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same, including support of schools, maintenance of poor, for repairs of roads and bridges, for Memorial Day, for lighting streets, and miscellaneous expenses.

3 To hear the report of Agents, Auditors, Committees, and all other officers heretofore chosen and pass any vote relating thereto.

4 To see if the Town will grant the free use of the

Town Hall on Memorial Day and evening to Abiel A. Livermore Post, G. A. R.

5 To see if the Town will vote to grant the free use of the Town Hall Friday afternoon preceding Memorial day for memorial exercises of the public schools and one evening to the high school graduating class.

6 To see if the Town will vote to widen and straighten the highway, known as the Forest road, at three points between Levi Putnam's mill and the dwelling house of W. N. Patterson and raise and appropriate money for the same.

7 To see if the town will vote to raise and appropriate Fourteen Hundred and Forty Dollars (being \$30.00 each for forty eight hydrants) or any other sum to be applied to the credit of the water works for hydrant service.

8 To see if the town will vote to raise and appropriate \$1200.00 or any other sum for the putting in of service pipes for the water works and the general improvement, care and maintenance of the system.

9 To see what compensation shall be paid to the water commissioners for their services for the ensuing year according to the provisions of the charter and to raise and to appropriate money therefor.

10 To see if the town will vote to connect the Engine

House with the sewer and town water and make any appropriations for the same.

11 To see if the town will vote to put a stand pipe into the Town Hall and the High School building attach 100 feet of hose and nozzle to each and raise and appropriate money for the same.

12 To see what action the town will take in regard to the income of the water system.

13 To see if the town will vote to place an electric light at or near D. E. Proctor's stable, one near the residence of Mrs. Ida B. Carter, and one on Highland Street near the entrance to the Perkins place, so called.

14 To see if the town will vote to authorize the School Board to change the present sanitary system in the High School building to a water system, and raise and appropriate a sum of money for the same.

15 To see if the town will vote to construct an iron railing commencing at William Hopkin's barn thence on the road to Lyndeboro about thirty rods to the Northeast corner of the land of J. L. Hardy and raise and appropriate money for the same.

16 To see if the town will vote to raise and appropriate the amount of money necessary to secure state aid for the permanent improvement of highways, under the law passed at the January session 1905.

17. To see if the town will vote to construct a sewer beginning on lower Maple Street near the residence of Timothy Pelletier, thence running in a Westerly direction connecting with the sewer as now located on Putnam Street and raise and appropriate money for the same.

18 To see if the town will vote to establish an electric lighting system and raise and appropriate money for the same or take any action thereon.

19 To see if the town will appoint a committee to confer with parties looking for a manufacturing plant and empower them to guarantee an exemption from taxation on all improvements made on any existing plants or act anything thereon.

20 To see if the town will adopt a provision of Chapter 124 of the Public Statutes of New Hampshire relating to dealers in old metals.

21 To see if the town will vote to install electric lights in the Town Hall Building and raise and appropriate money for the same or take any action relating thereto.

22 To see if the town will vote to discontinue a section of the highway leading from Wilton to Greenville, beginning at a point near the Goldsmith Brook, so called thence running Southerly until it intersects with a new highway.

23 To see if the town will grant the free use of the

Town Hall and supper room one evening in the year to the Fire Department for its annual party.

24 To see if the town will vote to purchase a suitable location and erect thereon a building for the storage of town property or take any other action relating thereto and raise and appropriate money for the same.

25 To see if the town will vote to establish a public refuse dump and raise and appropriate money for the same.

26 To see if the town will vote to relinquish whatever interest it may have in land lying Easterly of the fence extending in front of the dwelling house known as the Maria D. Newell premises at Wilton Centre and empower the Selectmen to execute a proper deed of the same.

27 To see what action the towh will take to regulate the celebration of "July 4th."

28 To see if the town will vote to accept the bequest of fifty Dollars of Hannah A. Spaulding to care for the burial lot of Charles Rideout in the South Cemetery.

29 To see if the town will vote to adopt the by laws governing the construction and use of sewers promulgated by the sewer committee or take any action relating thereto.

30 To transact any other business that may legally come before said meeting.

Given under our hands and seal this 24th day of February, in the year of our Lord nineteen hundred and six.

CHARLES O. PROCTOR, } Selectmen  
NATHAN CRAGIN, } of  
NICHOLAS COUGHLIN, } Wilton.

A true copy of Warrant—Attest:

CHARLES O. PROCTOR } Selectmen  
NATHAN CRAGIN } of

Inventory of Real Estate as assessed in District No. 4 on account of sewers.

Lands and Buildings,	\$354220 00
Tax Rate \$1.50 on \$100.	
Total amount Tax	\$5313 30

## ***Report of Selectmen.***

---

The Selectmen herewith submit their Annual Report, together with financial statement of the several departments.

The construction of the sewer which necessitated the assessing of the sewer tax together with the laying out and making a New Street, work on Forest Road, building of the Permanent Road, besides the regular business has made the year just closed an unusually busy one.

### **HIGHWAYS**

The construction and maintenance of the public highway is perhaps one of the most important departments that our town has. Without good roads we cannot expect to make our town appear to good advantage to the summer boarder, or to those who would make their summer home with us.

Of the \$3200 raised for repairs of Highways and bridges \$1483.50 had to be set aside for Permanent Roads leaving \$1716.50. Of this amount \$315.75 was due the Road Agent on last years account and the snow bills from the end of the fiscal year to March 14, 1905 when the new appropriation was available amounted to \$131.54 leaving \$1259.31 with which to fix somewhere about 99 miles of road and keep them in repair for one year. The last named amount was found to be insufficient, as the hard rains last summer washed the roads badly making them dangerous in places which made it necessary to over run the small amount left.

## NEW STREET

During the summer there was a petition for a New Street commencing on Bow Street near the residence of Mrs. Cordelia Sheldon extending across land belonging to the said Mrs. Cordelia Sheldon and to David A. Gregg, to land belonging to Henry L. Emerson. The laying out of the street as petitioned would leave it closed at one end, namely that of Henry L. Emerson. We did not think it advisable to lay out the street as petitioned as the general feeling was that the street should extend through to the street leading from Forest Street to the residence of Henry L. Emerson and thereby making it a benefit to the public. In order to do this it became necessary to buy a right of way across land of Henry L. Emerson as there was no petition for it.

## FOREST ROAD.

\$500.00 was voted at the Town Meeting March 14, 1905 to straighten and widen three points on Forest Road between Levi Putnam mill and William N. Patterson. We found that the amount was insufficient.

We were unable to let it out by contract so employed A. D. Young to do it by the day. We found the wall on the side next to the river in one place in a dangerous condition. As there was no place to dump the rock blown out in straightening the curve without hauling them a long distance and thereby making the expense greater. We used the rock to reinforce the wall. In order to do this we found it necessary to buy the land between the road and the river belonging to E. J. Hopkins.

There are other advantages to the town in the posession of this tract of land which will become more apparent in the future.

### ***Appropriations.***

The following estimate has been made for appropriations necessary to meet current expenses for the ensuing year.

For Highways and Bridges,	\$3200 00
Schools not including literary fund,	6000 00
State Tax,	2180 00
County Tax,	1705 68
Payments on notes and interest,	6000 00
Fire Department,	800 00
Street Lights,	600 00
Town Officers,	700 00
Public Library,	300 00
Support of Poor,	200 00
Printing and Stationery,	100 00
Miscellaneous Expenses,	200 00
Care of Hearse and Cemeteries,	200 00
Police Court,	100 00
Memorial Day,	50 00
Permanent Road,	977 00
	_____
	\$23312 68

## ***Town Expenditures.***

Town Treasurer.

We the undersigned hereby certify that we have examined the foregoing account of town treasurer and find it correctly cast and properly vouched.

GEO. G. BLANCHARD  
ARTHUR C. YOUNG

Auditors of Wilton

## Report of Board of Water Commissioners

---

At the town meeting held in March, 1905, we were authorized to contract with the town of Milford and with others to extend the Water works to Pine Valley and to furnish water to corporations and others in that vicinity. In pursuance of this authority we have contracted with the town of Milford to furnish hydrant service to the Pine valley region for twenty years at the cost of \$150 per year. We have also contracted with the Hillsboro Mills to furnish hydrant and sprinkler services for that corporation for the same sum for the same term. In the last named case however the sum of \$1000, has been paid in advance, being \$50 per year for twenty years. Thus the annual receipt for service from this corporation will hereafter be only \$100 for that term:

We entered into a contract with Ablett & Bowes to lay an eight inch water pipe, hydrants, etc., from the Milford line to the premises of the Hillsboro Mills. This firm completed the work to our satisfaction. The sum appropriated for the undertaking at the last town meeting was \$2200. The cost as will be seen in account below somewhat exceeded this sum, due to a greater amount of ledge and rock than was estimated. The Pine Valley Extension account has been closed and carried to the Pipe Line account of the general Water Works system.

Turning now to the general Water Works System it should be said that the work of construction done in the

previous year left but little more to do. The few things done were some grading at the dam, the insertion of two valves in the main line and the repairing of a break due to poor workmanship in a joint opposite the railroad station. Connected with the Water works, but not due to any break in the pipe itself was a washout in a culvert on Main street opposite the hotel. It will be seen that these matters have all been rather small and the defects trifling. It may be said that the Water Works, so far as construction is concerned, have given complete satisfaction. At the fire in the stable connected with the hotel the water was found abundant and more than abundant. At the hotel on Main street the pressure is 110 lbs. per sq. inch.

Coming to the income account it is gratifying to report that in the important matter of revenue the Water Works have realized expectations. Ninety-three ordinary service pipes have been put in this year, making now 116. To these should be added two large customers, the Hillsboro Mills and the town of Milford and more important than all is the town's own use of water for its own hydrants. All these sources of income have produced 3753 99, which, includes the small item of \$66.20 received in the fraction of the year 1904 in which the Water Works were doing service.

It should also be called to mind that the expectations of the recommending committee in July, 1904, that the insurance rates would be reduced on account of protection furnished by the Water Works have been satisfied. As a sample of the reduction accomplished it may be enough to

say that the four year term on a dwelling house has now been lengthened to five at the same premium as heretofore.

On the other hand we have been disappointed at the cost of putting in the service pipes. This cost was estimated by our engineer at \$6.50 per service. We have found the cost to be about \$24.00. A part of this high cost was no doubt due to the hurry under which some of the work had to be done and to inexperience. These disadvantages are being overcome in a certain degree, but it appears to be plain that on account of the character of the soil of our village the cost can never be brought down to the engineer's estimate.

It is not within the province of the Water Works commissioners to show a complete income account of the Water Works since the most important item of the interest on the bonds is not paid by them. It may be proper however, to say that with that interest considered (say 3 3-4 per cent on \$45,600 for this year or \$1687 50) the Water Works have paid their expenses in the first year of their existence and would have done so without the extraordinary item of \$1000 00 received from the Hillsboro Mills.

The financial statement follows herewith.

Mr. Starr B. Center resigned Jan. 1, 1906 on account of moving from town and Mr. Artemas O. Barker was appointed in his place.

## Report of Committee On Public Sewer.

The undersigned were appointed a committee to construct public sewer at the town meeting held in March 1905. We advertised for bids both for material and for laying the pipe. The most favorable bidders were the Eastern Clay Goods Co. of Boston for the pipe and cement and Ablett & Bowes of Cohoes, New York for laying the pipe. These concerns were awarded the contracts. Both the material and the workmanship of these parties have been entirely satisfactory. We also employed for engineering and inspecting Mr. Arthur W. Dudley and his son Fred Dudley of Manchester, thereby securing the assistance of the same person who had become acquainted with the needs of the work through his connection with our water works. The work was begun on May 17 and completed about September 9. As soon as the completed sewer was handed over to the selectmen that body immediately appointed us managers of the sewer until next town meeting. We thereupon notified our people that the sewer was ready for service and issued rules and regulations for its use. Only 24 of our people availed themselves of the opportunity to connect last fall.

A statement of the cost of the sewer follows. There should be added to it the sum of \$300. retained from Ablett & Bowes as a guarantee.

I. S. Whiting,  
C. E. Weeks,  
A. O. Barker.

## ***Report of Cemetery Committee***

---

The committee on cemeteries hereby report that they had on hand at the beginning of the fiscal year of 1905 a balance of cash collected from lot owners for work upon memorial stones of \$21.01. During the year labor has been done resetting stones in the south yard costing \$2, leaving a balance of \$19.01.

No special work calling for the expenditure of money has been done or seemed to be needed during the year, upon either of the lots for which funds are held.

Since the last report deposits have been received from estates of Dorcas Peabody of \$100, deposited in Central Savings Bank, Lowell, Mass. M. A. Peabody, of \$100, deposited in Five Cents Savng Bank, Lowell, Mass., Phebe S. Putnam \$100 held by town treasurer, all bearing interest at 3 1-2%. The condition of the several funds at the present time is as follows viz. :

The A. N. Burton fund amounts to \$232 07

The D. A. Gregg fund amounts to \$205 27

The Dorcas Peabody fund amounts to \$101 75

Phebe S. Putnam fund amounts to \$101 32

Solon Tarbell fund amounts to \$108 76

Jacob Kendall fund amounts to \$102 63

M. A. Peabody fund amounts to \$102 63

These funds now all bear interest at the rate of 3 1-2%

per annum. The Savings Banks in Lowell having each of them reduced the rates allowed from 4 to 3 1-2% during the last year.

The fences around parts of the village and of the South cemeteries have been put in repair as per the vote of the Town, costing as follows, for wire and material furnished by D. E. Proctor \$38.68, for labor and material paid to J. L. Kerr \$81.60; for labor paid to George D. May, \$19.60, for painting fence at village cemetery paid to D. Sumner \$35.

Mr. Barnes sometime during the summer arranged with responsible parties to remove the clump of trees from the village cemetery, as per vote of town, press of work has prevented its being done until this time. We are now assured that it shall be done without further delay.

#### RECOMMENDATION

The death of Mr. W. H. Barnes on Sept. 24, removed from your committee a valuable member. One who always had the care and improvement of the cemeteries at heart.

John E. Fitzgerald was appointed by the selectmen to fill the unexpired term.

Your committee would recommend that a portion of the brick wall of the tomb be relaid and that a more suitable place be found for storing the hearse.

Also that the sum of two hundred dollars, (\$200.) be raised at the annual town meeting to meet the expense of these or any other necessary repairs and for the care of the cemeteries for the coming year.

Respectfully submitted,

J. F. KIMBALL

HENRY HERLIHY

J. E. FITZGERALD

Committee.

## **Report Of Engineer**

April 1st the Selectmen appointed Frank E. Proctor, Daniel M. Brennan, and M. J. Herlihy, Firewards.

M. J. Herlihy, Chief

F. E. Proctor, 1st Asst.

D. M. Brennan, 2nd. Asst.

Excelsior Engine Co. and Carmi Volunteers were at once disbanded and three Hose Co's. of twelve men each with a Hook and Ladder Co. to consist of three men from each Hose Co. immediately formed and instructed in their duties, ready for service.

We are pleased to have a very small fire loss to report for with seven call alarms and eleven still alarms, the most serious fire and largest loss was at the Hotel Stable Nov. 16th. Loss adjusted for and insurance paid \$590.25.

The water system, at this fire, demonstrated its great value to this department, undoubtedly saving many thousand dollars worth of property.

Apr. 17th. The Hydrant service and department were inspected by Col. R. N. Elwell representative of Fire Underwriters.

After a thorough test and examination Mr. Elwell announced his satisfaction with and approval of the service. The result was a substantial reduction in insurance rates within the territory covered by the hydrant service.

There is a demand for hose in sections outside of the village proper which the Firewards with present equipment are unable to furnish.

We purchased in Nov. last, three holders with pipes and tips, known as the Eastman Holder and nozzles, considering them much safer for firemen to use on our high pressure. Also purchased two Y's for long lines of hose.

We have on hand 1000 ft. good serviceable hose and 500 ft. more or less damaged.

We recommend the purchase of 500 ft. new hose and an appropriation to purchase one or more hose carts.

Our firemen are underpaid in comparison with same service in other towns.

During the year we disposed of all leather and cotton hose considered unsuitable or unsafe for use.

To conform to Chap. 97, Laws of 1905 it will be necessary for the town to make separate provision for pay of Fire Warden and any men or teams we may employ, while the firemen have responded to all calls for assistance at brush fires the past year it is not a part of their duties without extra compensation for the same.

We thank the public for many courtesies shown and good will toward this department.

We take this opportunity to thank Starr B. Center for a gift of \$25.00 to form a firemen's relief fund.

Respectfully submitted,

M. J. Herlihy

Frank E. Proctor

D. M. Brennan

Board of Engineers.

## Report of School Committee

---

To the Citizens of the Town of Wilton:

The School Board respectfully submit their report for the year ending February 15, 1906.

The annual meeting of the school district was held March 18, 1905.

Mr. Richard M. Moore was elected a member of the Board of Education for the term of three years and Mr. Albert Beard was elected a member for the term of one year, to fill out the vacancy caused by the resignation of Miss Maria L. Moore.

The Board organized by the choice of Warren P. Putnam, chairman and secretary, and Richard M. Moore treasurer, from which time the Board has worked with but one object and that the best interests of the schools.

Owing to the long, severe illness and death of Mr. Beard, the Board was deprived of his valuable services.

### REPAIRS

The past season the Intervale and West houses have been shingled and the Davisville house newly plastered, papered and painted inside. This building needs shingling.

The Intervale, Center and West houses need paint, paper and a general renovation in the inside to put them in a wholesome condition. The pumps at the Intervale and Center houses are worn out and must be replaced by new ones.

The Board very earnestly recommend that the present sanitary system in the High School Building be changed to a *water* system.

The present system will require quite an expenditure in repairs the coming summer, if it is continued and for the good of your children we earnestly hope the Town will see fit to make a change.

The Kimball school has been discontinued for lack of scholars, there being only four below the Grammar Grade.

The Fall term they were brought to the Village school, but all must admit it is a long cold ride for small scholars and this winter they are being carried to Greenville, less than one half the distance. The Board is paying tuition for them.

#### SUPERVISORY DISTRICT

Agreeably to the vote of the school meeting of March 18, 1905, instructing the Board to unite with one or more towns, for the purpose of employing a Superintendent of schools, the Board met the Boards of the towns of Antrim and Milford at the High School building in Milford and with the assistance of the State Superintendent Henry C. Morrison organized a supervisory district, consisting of

the towns of Antrim, Milford and Wilton. The joint Board organized by electing C. F. Butterfield of Antrim, chairman, R. M. Moore of Wilton treasurer, Mrs. Fannie C. Averill of Milford, secretary. On June 1, 1905 the joint Board met at the High School Building in Wilton, for the purpose of electing a Superintendent of Schools, after several ballots Hervey L. Woodward was elected for the year commencing July 1, 1905. Salary \$1500, Milford paying \$700, Wilton \$500, Antrim \$300, one half of the salary coming from the state.

The addition of a superintendent to the corps of instruction is a decided advance in our educational institution. Its advantages will doubtless be apparent when the scheme has had a fair test. Its full value to our schools cannot be estimated by one, or even two year's trial. The introduction of new methods and practices must necessarily come slow, or there is liable to be friction and uncertainty.

It is a matter of congratulation that the changes suggested and introduced, have been adopted with a fine spirit of willingness on the part of our teachers to give them a fair trial.

Respectfully submitted,

Warren P. Putnam, chairman.

## Report of Superintendent of Schools.

---

To the School Committee of Wilton, N. H.

It gives me pleasure to submit herewith my first annual report, it being also the first in the series of superintendent's reports.

It has been a matter of great satisfaction to me to experience such cordial support from the members of your committee, the cheerfulness with which you have granted your approval of those plans that in your judgment promised to forward the work in the public schools. The cordiality with which your principal and teachers have welcomed any suggestions I had to offer has been most gratifying. Even the children have lent their share toward the harmony which has thus far characterized the year's work. Nor do I forget the assistance I have received from those citizens who have by their gracious and cordial manner been a source of encouragement to me in this new work among them, work which I assure you is fraught with many perplexing problems and peculiar difficulties.

In entering upon my duties I did not do so with the purpose of revolutionizing your entire system in a few months, for this would be the extremest folly. You may be sure that whatever changes have been made were inaugurated by the sole desire to better the opportunities of

our children. To see them develope into noble manhood and womanhood shall ever be my supremest satisfaction.

With no excuse to offer I place this topic before the formal studies of school life. To inspire **MANNERS AND MORALS** the youth to high ideals of morality is the greatest calling in life. Of what avail is all the knowledge of the books if wayward and selfish impulses are unchecked and mistaken attitudes toward society lead away from good citizenship? The best product of a town should be, not its cloth nor its furniture, but its youth—noble youth. If they are worthy in spirit, then the industry and the welfare of the community is secure and its happiness complete. President Eliot remarks, “The scholar should be a gentleman.” Do our youth show the promise of law abiding, law loving citizens? In common with many others, I plead for a recognition of the educational value of courtesy to and service for others. From obedience grow honor, respect, and reverence. The best lesson a boy or girl ever learns is instant obedience to rightful authority. Huxley says, “The most valuable part of education is the ability to make yourself do the thing you *ought* to do whether you like it or not.” Let our parents co-operate with the school in fostering right morals and a decent courtesy in our youth, and our schools shall not be in vain. It will be observed in the time table on another page that a considerable part of the daily work is given to this topic of manners and morals.

**INSTRUCTION** It is always easy to criticize any course of study, a different matter is it to substitute something better. Early in the fall there was placed in the hands of each teacher a copy of a Course of Study prepared by the State Department of Public Instruction. The teachers were directed to adjust the work thereto as closely as limitations would permit. After careful examination it became apparent that the topic of reading should command first attention.

**READING** Upon reading is based all future school attainments and therefore in the first grades it is an all important subject. Two distinct objects may be in mind in reading work—to acquire a taste for good literature and to develop the power of thought-getting. In the lower grades a beginning has been made in the right direction by supplying new reading matter. It may here be stated that poor reading exists in the schools more from poverty of subject-matter than from poverty of instruction. Early in the present term new subject matter was given to all the grades and the results are surprising. The children read more intelligently and with far greater interest than formerly and it is hoped that by the end of the year some very good work shall have been done in this subject in every school.

**SPELLING** Poor spelling is the bane of all school work. Poor spelling betokens a careless individual. Careless individuals do not make good citizens. Special efforts have been made

by the teachers in this subject and I am sure that, if the lines of this work are proceeded upon as suggested in the course of study provided, at the end of the year there will be a noticeable improvement herein. These two subjects have for the most part concerned my especial attention but others will be taken up at opportune time.

**MUSIC** "Music is God's best gift to man, the only art of Heaven given to Earth, the only art of Earth that we can take to Heaven." The music of the school room, like most other branches presented to young minds, falls short of the ideal, yet few of us would care to see its place occupied by some other subject. The object of musical instruction in our schools is a mooted question with educators, but I hold to the opinion that it should be to interpret the spirit of song and to inspire love for music.

The report of the supervisor is found elsewhere.

**DRAWING** The end of all education is culture. A man of culture is impressionable and yet is capable of original deeds. May we not be able, as Ruskin says, to sing or paint ourselves into good men? Drawing is the magic wand to which Nature unfolds her beauties, and no man who fully understands and appreciates nature "in her various moods" can be very far from his Maker. It is not the object of this branch to produce artists, nor is it the aim of music to produce *prima donnas*, of arithmetic to make arithmeticians, of language to make linguists. The Journal of

Education makes the following statements:

“Teach children drawing and art and they will live in better houses, will take better care of them, will dress better, will earn more, will spend it better, will make a larger tax return. Teach the children in your town drawing and art wisely and well, and they will return in the increase of taxable property ten times all that you invest in them. Every phase of the great public school system that broadens its scope, that enlarges the aspirations of its children, increases the rate of interest and improves the investments as definitely as money in blooded stock is better than in mongrel herds.”

It is to be hoped that the time is not far distant when provision will be made for the instruction of the children in this very important branch.

In a circular entitled, Expert Supervision of Schools, recently distributed by Superintendent ATTENDANCE Morrison of the Department of Public Instruction for the state of New Hampshire, the following appears as one of the chief duties of the superintendent:

1. “In company with the truant officer he should make a thorough canvass of the whole town and see that all children are in school. This has proven in most cases one of his most important services. Perhaps it is especially important just now since there can be no doubt that the regrettable low standing of New Hampshire in the point of illiteracy, as compared with other states, is due largely to the fact that many children of school age fail to attend school.”

Thoroughly in accord with the State Superintendent I have strenuously labored in a variety of ways to secure a good attendance record for our schools and I must confess to disappointment. Many of the children have responded nobly to my direct appeal for better attendance but I am sure that there are some who lower our standard without valid reasons. And, must I say it, in some cases parents are the cause of teaching their children no regard for regularity and punctuality, two most important habits to be acquired by the child in order that the adult may prosper in life. Believing that some of the parents and custodians of children do not know the law regarding attendance of children at school the following excerpts or sections are given :

No child shall attend any public, parochial, or private school unless he has been vaccinated or has had the small-pox, and this section shall be enforced by the board of health.

No parent or guardian, person or persons having the custody of any child, shall permit such child, if infected with any communicable disease, or has been exposed to such, to attend any public or private school.

Any person who knowingly violates any provision of this chapter, or any regulation established by authority of this chapter, shall be punished by a fine of ten dollars for each offense.

No child under the age of twelve years shall be employed in any manufacturing establishment. No child under the age of fourteen years shall be employed in any

manufacturing establishment, nor in any mechanical, mercantile, or other employment during the time in which the public schools are in session in the district in which he resides.

No child under the age of sixteen years shall be employed in any manufacturing establishment, or in any mechanical, mercantile, or other employment, during the time in which the public schools are in session in the district in which he resides, without first presenting a statement of his age from his parent or guardian, sworn to before the superintendent of schools, or, if there is no superintendent of schools, before some person authorized by the school board of the district in which such child is employed.

And no child under the age of sixteen years shall be employed as aforesaid during the time in which the public schools are in session in the district in which he resides without first presenting a certificate from the superintendent of schools, or, if there is no superintendent of schools, some person authorized by the school board, that such child can read at sight and write legibly simple sentences in the English language. And any superintendent of schools or person authorized by the school board who certifies falsely as to matters prescribed by this section shall be fined not less than twenty nor more than fifty dollars for each offense.

If any owner, agent, superintendent, or overseer of a manufacturing, mechanical, or mercantile establishment or any other person shall employ any child in violation of the provisions of either of the three preceding sections, he shall be fined not exceeding fifty dollars for each offense, for the use of the district.

Every person having the custody and control of a child between the ages of eight and fourteen years, or of a child under the age of sixteen years, who cannot read at sight and write legibly simple sentences in the English language, residing in a school district in which a public school is annually taught, shall cause such child to attend the public school all the time such school is in session, unless the child shall be excused by the school board of the district because his physical or mental condition is such as to prevent his attendance at school for the period required, or because he was instructed in the English language in a private school approved by the school board for a number of weeks equal to that in which the public school was in session in the common English branches, or having acquired those branches, in other more advanced studies. Any person who does not comply with the requirements of this section shall be fined ten dollars for the first offense and twenty dollars for every subsequent offense, for the use of the district.

Teachers are instructed that necessary absence is

- (1) Due to child's own sickness
- (2) Due to communicable disease in household
- (3) Due to very inclement weather
- (4) Due to death in immediate family

They cannot excuse absence for

- (1) Failure to file certificate of vaccination or exemption therefrom
- (2) Failure of parent or other persons responsible to provide necessary clothing
- (3) Desire of parents or custodians to utilize the labor of the child

(4) Failure to enter school promptly when transferred from one school to another

The attendance records may be found in a table of the appendix

It will be noticed the law recognizes that it is the first business of the school authorities to safeguard the health of the children. When danger is suspected the child is sent home. Whenever there is any doubt as to contagious disease the rooms and books are promptly fumigated. As a preventative, it is recommended that parents provide their children with a convenient, small collapsible drinking cup. For the benefit of teachers and others the following table of contagious diseases are inserted :

Disease	Quarantine after Exposure	Earliest date of return to school
Diphtheria	12 days	At least two weeks after complete recovery or four weeks from attack if no bacilli remain.
Scarlet Fever	14 days	At least two weeks after recovery or six weeks after attack and then only if no desquamation or sore throat remains
Small Pox	18 days	When all scabs have fallen off. At least two weeks after recovery or four weeks from attack
Measles	16 days	At least two weeks after attack or 3 days after recovery if all cough and desquamation have ceased

Children from households exposed to the above diseases are forbidden to continue in school. The foregoing diseases can be carried in the clothing. In cases of the following diseases other members may attend school so long as they are well.

Disease	Quarantine after Exposure	Earliest date of return to school
German Measles	16 days	Two or three weeks after attack
Chicken Pox	18 days	When all scabs have fallen off. Exclude from school if small pox is prevalent because small pox may be mistaken for it.
Whooping Cough	21 days	Six weeks from the commencement of the whooping, if all the symptoms have subsided
Lice and Itch	Till cured	Exclude from school and recommend lard and flowers of sulphur or oil of lavender for the first named

If education is ever to aim at that which is complete and best, it must comprehend the entire child. Fundamental in this, it seems right to expect that the product of the school shall be the individual blessed with good health. The researches of Dr. Kotelnmann establish the fact that the schools are the causes of defective sight, hearing, and other serious affections. The exhaustive researches of Dr. Cohn add further testimony to what any observing school-man may learn. In some states medical inspection

MEDICAL  
INSPECTION

is compulsory and in many cities and towns a thorough system of inspection is in vogue. We can hope for something simple. At a very small cost there can be secured the efficient services of reputable physicians to inspect our children quarterly. Even if the examination included nothing more than eye and ear inspection great good would be accomplished.

This naturally leads to a suggestion that is worthy of your most careful and sympathetic consideration. Our children begin their ENTERING AGE school life too young. This is evidenced by the fact that you have been obliged to institute a nine years elementary course in order to give the child that maturity and ability to accomplish the attainments required in the high school. This is an expense of a year's life to the child and also a year's expense for instruction to the town.

In January I sent to all the superintendents in the state a circular letter embodying the following questions. The consensus of opinion substantiates the wisdom of that I am to recommend.

- 1 Have you nine grades below your high school?
- 2 If so, what subjects are taught in grade nine?
- 3 Do you advocate a nine grades system?

- 4 Do you do so if no high school subjects are taught in grade nine?
- 5 At what age are pupils admitted to grade one?
- 6 Would you recommend a different age?
- 7 If so, what?
- 8 Do you think that eight years are sufficient to fit the average pupil for high school if he enters grade one at five years?
- 9 At six years?

Responses were received from every letter. Thirty per cent. replied that eight years were sufficient to prepare the average pupil for high school, if he entered grade one at five. Seventy per cent. responded in the negative. More than fifty per cent. reported five years as the age of admission but less than half of these reported that they would not raise the age limit. It is seen from these data that more than seventy per cent. advocate a higher age limit, most stating six, although twenty per cent. suggested nearly seven years. Seventy per cent. state that if the child enters at six years in grade one he can prepare in eight years for high school. Therefore, I believe that I am recommending to you a step that is abreast of the times when I suggest that the age of admission be made six years and that we place our grades upon an eight year basis. This will result in good to both ends of the school system, the elementary and the high school. The latter is now small and the new regime suggested would make

the numbers in the high school about forty five according to the present percentage of membership in all the schools. Considered from the weakest standpoint, that of taxation, the town would be educating the pupils to the same extent as now at something like a saving of five hundred dollars on the basis of \$20 per capita, as cost of instruction.

Such a policy would permit of adjusting in another year the work in the first three grades.  
**ADJUSTMENT OF GRADES** The present scheme requires four or more years of the child's life to accomplish the first three grades. This should not be. I am sure that the classification can be readjusted so that this year lost may be saved. In consideration of this recommendation I trust that you will recognize that it is owed to the *children*.

The changes in the teaching force since last June were as follows: Harriett H. Cooper succeeded **TEACHERS** Elsie C. Phillips at the Abbott Hill School, Ethel M. Hadley succeeded Beulah Edwards at the Intervale School. Mary Wheler succeeded Emma F. Gordon and was succeeded in turn by Julina B. Howe at West Wilton School, Evelyn G. Chesley succeeded Bessie B. Tallant at Center School, Lucy S. Blanchard resumed her work, after leave of absence, in Grade I and II, Alice E. Maynard succeeded Jessie M. Hagar as supervisor of music and Louis L. Whitney, M. A., was elected to fill the vacancy in the principalship caused by the resignation of H. H. Pratt. It is seen that

the out schools suffer most from changes in teachers. This condition cannot be overcome until a larger remuneration is offered to the teachers of our out schools. Equal school privileges should be given *all* the children and to this end I trust the time will soon come when we can be sure of the services of valuable teachers in these schools by offering the right compensation.

This suggests the fact that these schools have been given this last year the same number of weeks as the center graded schools. This does away with a practise which is in repugnance to all state school legislation which tends to equalize school privileges. I trust this policy will continue in the future.

Following is the report of the Principal of the high school.

## Report of Principal of High School.

---

To the Superintendent of Schools, Wilton, N. H.

Seven students received diplomas from the Wilton high school last June, six entered from the grammar school in September, a net loss of one, so that our membership was small from the beginning of the year. Next June one student will graduate; the ninth grammar grade now numbers twenty three and there will probably be a net increase of nearly twenty in September. A year later four students may graduate and the present eighth grade, now numbering twenty one, will again cause a large increase in the membership of the school. Of course this will be partly offset by losses. Statistics show that in the average high school, the freshman class is from one third to a half of the whole number, and that only one in five or six of these who enter, remains to graduate. The prospect is that the membership of this school will increase for the next few years.

Business schools meet a want of the community which small high schools are unable to supply, but which is so well recognized that large city high schools are offering as complete business courses as the business schools themselves. In the competition to get students managers of business schools resort to arguments which are funda-

mentally false. Business men know that stenographers and book-keepers need a better ability to write correct, clear English, and broader information about things than the average grammar school graduate possesses. In the long run it is economical to spend two or three years at least in the high school and then go to a business school, unless (the better way) business subjects can be taken as part of the four years' high school course. Representatives of business schools not only try to secure as students boys and girls who have just left the grammar school, but also state that attendance at high school spoils one's chances in a business course. The consequence of this "dog in the manger" policy is that boys and girls who ought to be in the high school and who hope in a year or two to go to a business school, if they fall under the influence of business-school men, stay away from the high school without attending the business school. It is a mistake.

Respectfully submitted,

LOUIS L. WHITNEY,

Principal High School.

February 10, 1906.

## Report of Supervisor of Music.

In this report I wish to review briefly the work done during the current school year and to speak of some much needed improvements. All the schools have done good work and shown improvement during the year.

Very little real progress can be made, however, until new books can be provided with which to work. The stimulus given and the new grade of work taken up with new books would be of a very great advantage to every pupil. Another draw back is working with two grades in a room. If the work with each grade could be taken separately, there would doubtless be better progress.

In all the grades the work has chiefly followed the outline in the books supplemented by such outside work as is necessary to increase the interest. Rote songs have been taken, each appropriate to the time and season.

In the high school the work has been along the line of three and four part songs.

The teachers show much interest in the work and the pupils are fully up to the average in ability and with a comparatively small outlay the musical work in our schools could be put upon a higher standard.

To the superintendent, school board, and teachers I extend my thanks and appreciation for all favors received and interest manifest in the work.

Respectfully submitted,

ALICE E. MAYNARD.

Supervisor of Music.

February 19, 1906.

In formulating this report I have endeavored to bring to your attention those things which vitally **IN CONCLUSION** concern our schools and such information as you and our townsmen may be interested in and I trust my efforts have not been in vain. It is a pleasure for me to add here that our teachers have contributed in no small measure to the administration of our work. They have been cheerful, faithful, and patient and their loyalty is a source of inspiration. To the committee I am grateful for that measure of trust they have reposed in me, that freedom of action in my work which has challenged my loyalty as a subject. Trusting that our community who has sustained our schools may find in our endeavors some good accomplished and the earnest of better things to come, this report is

Most cordially submitted,

HERVEY LUCIUS WOODWARD,

Superintendent of Schools.

February 20, 1906.

## APPENDIX A

## Attendance Table for School Year ending June, 1905

SCHOOLS.	Enrolled	Average Membership	Average Attendance	Percent Attendance	Half day Absences	Number Tardinesses	Number Dismissals	Visits by Committee	Visits by others
High	29	27.6	24.9	90	876	48	24	4	31
Grades IX, VIII	33	29.5	26.6	91	1070	72	66	7	60
Grades VII, VI	42	39.3	35.7	91	1101	128	47	3	85
Grades V, IV	43	41.	35.5	85	1689	165	85	5	76
Grades III, IIb	46	41.5	35.8	86	2109	92	67	7	66
Grades II, I	72	53.3	42.1	79	3242	149	116	7	152
Intervale	26	22.9	18.1	82	1464	183	32	5	169
Abbott Hill	9	8.6	7.8	91	226	15	26	4	38
Davisville	20	15.7	12.6	80	804	19	14	5	27
Centre	16	14.	12.1	86	755	34	3	5	73
West	19	15.1	14.1	94	286	49	41	4	68
Kimball	8	8.	7.5	93	130	10	11	3	17
	363	316.5	272.8	87	13812	964	532	59	862

The foregoing table shows that the average absence per child in the entire year was 43.7 half days. Very bad showing. It is seen that the average attendance was 87%. According to the last state report this is 1% lower than the state average. Let us be nearer the top. The school to secure the highest % was the West.

The average tardiness per pupil for the year was 3.0 which is five times as large as it should be. The number of visits accorded the schools by parents and others, excluding committee's visits was large and a commendable feature. Average dismissals is 1.7.

## APPENDIX B

The following is the record for the Fall Term of 1905. From it can be judged of the success of our efforts to better the attendance.

All Schools for the Fall Term	Enrolled	Average Membership	Average Attendance	Per cent Attendance	Number Absences	Number Tardinesses	Number Dismissals	Visits by Committee	Visits by others	Visits by Supt.
Totals	330	291	263	91	2647	201	195	38	302	46

At the foregoing rate the averages per child for the *whole* current year will be

Absences, 26; Tardinesses, 1.4, Dismissals, 1.3; % attendance, 91. Number of visits exclusive of Committee and Superintendent, .660. These items we hope to improve before the end of the year.

APPENDIX C  
Distribution by Grades and Ages of Pupils in the  
Village Schools

Grade	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	Totals by Grades
First	9	10	12	6												37
Second	2	8	8	3	2	1	1									25
Second b	4	11	3	2	1	1										22
Third	6	9	4	2	2	2			1							24
Fourth	5	9	5	3												22
Fifth		2	7	8	4				1							22
Sixth		11	2	3												16
Seventh			9	6	2											17
Eighth			10	11	1											22
Ninth				9	8	6	1									24
Tenth					2	4										6
Eleventh						3	5	1	1							10
Twelfth							1	2	3	1						7
Thirteenth								1	1							2
Totals by ages	9	12	24	31	20	19	27	36	33	14	13	8	3	5	2	256

The above shows distribution as per grades and ages. Figures in bold face represent pupils in respective grades at *normal* age. All those at right of bold face type represent those pupils over age and those at the left represent pupils under age.

#### APPENDIX D

In September 1905 there were enroled in *all* the public schools 330 pupils distributed by grades as follows;

Grades	High School													Total
	I	II	III	IV	V	VI	VII	VIII	IX	X	XI	XII	XIII	
Number	50	58	33	29	24	31	22	33	25	6	10	7	2	330

#### APPENDIX E

Comparative table of Enrolment, Membership, Attendance.

	1897	1898	1899	1900	1901	1902	1903	1904	1905	Fall Term 1906
Enroled	370	384	400	384	387	374	374	364	363	330
Average Membership	330	294	339	328	307	316	320	318	317	291
Average Attendance	303	275	314	280	270	285	278	274	273	263
Per cent. Attendance	95	93	93	85	88	90	87	86	87	91

## APPENDIX F

Time Assignment for the Elementary Schools.  
 Based on Program of Studies for the Common Schools of  
 New Hampshire.

Opening Exercises	I	II	III	IV	V	VI	VII	VIII
